## **Thermal grease HP**

It is necessary for correct operation of any type of temperature sensors. It protects from weather conditions and prevents from breakthrough. It is characterized by very good chemical resistance for oxidation, water solutions of acids, alkalis and salts, sulphur dioxide and ammonia. It has a very wide range of work temperatures. Thermal conductiviti > 1.5 W/mK

## Application:

Cooling equipment on the end panels or frames

Mass and high-speed storage drives

Motor control systems in the automotive industry

Hard disk and DVD drives

Power converters

High power LEDs

Network communication devices

Household appliances

Electronic and electrical components

.

Transmission of heat from the heat pipe condenser to exchanger in a vacuum solar collector
