1. GENERAL FEATURES

Display Elektronik GmbH is specialized in LCD-products.

- There is a wide range of standard lcd-panels. Most of them are available from stock.
- Most of our standard panels operate within the extended temperature range (-20° C to $+70^{\circ}$ C).
- For the static types the Vlcd is ready for 3 Volt, like shown in the following table. For most of our multiplexed standard panels we offer a 3Volt and a 5Volt model.
- Most panels are available in reflective and transflective version.
- In general we offer a standard pinlength from stock. Pls ask us in case you want a different pinlength. For the LCD-panels without pins we also offer elastomeric connectors (zebras).
- For outdoor applications we offer suitable LCD-displays with extreme wide temperature range and UV-stability etc...

2. ORDERING INFORMATION

Example:

DE-113-RS-10/7,5 LCD 3½ digits Digit height 12.7 mm Reflective Standard polarizer Standard temperature Fixed pins Pinlength 7.5 mm

3. MODEL TYPES

Our actual model types are:

MODEL	POLARIZER	POLARIZER	OPERATING	PIN	VIEWING	OPERATING	VOLTAGE
NAME	MODE	TYPE	TEMPERATURE	LENGTH	DIRECTION	VOLTAGE	MODE
DE 115-RS-20/7,5	reflective	standard	-20°C +70°C	7,5	6° clock	3-5 Volt	static

4. MECHANICAL SPECIFICATIONS

5. PIN ASSIGNMENT

SEG	3A	3F	3G	2B	2A	2F	2G	1B	1A	1F	1G	NC	NC	LO BAT	:	BP
PIN#	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31	32
SEG.	BP	-	1BC	DP1	1E	1D	1C	DP2	2E	2D	2C	DP3	3E	3D	3C	3B
PIN#	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

6. ELECTRICAL AND PHYSICAL PROPERTIES

At an ambient temperature	Standa	ard tempe	rature	Extend	ed tempe	rature	Wide to			
of 25°C	min.	typ.	max.	min.	typ.	max.	min.	typ.	max.	Unit
Operating voltage	en 1990/e	3	10,000		3		0.000	5	2000,777	V
Driving frequency	30	32	100	30	32	100	30	32	100	Hz
Current consumption	ÇKI BYSAND	1,0	2,0	47799	1,0	2,0	10,000	1,0	2,0	μA/cm ³
DC-voltage allowance			50			50			50	mV
Response time (ton + toff)		440	9		440				450	ms
Operating temperature	-10		60	-20		70	-40	9	90	°C
Storage temperature	-20		65	-40		90	-40		90	°C
Lifetime					100 000					h

7. APPLICATION NOTE

Distance of pinrow to pinrow = glass-size +2.54 mm

DIL-Pins

Pinlength = Distance between rear side of LCD to end of pin

Ø hole in PCB typ. 1,0 mm

8. SEGMENT DEFINITION

Digits to be counted from left to right.

MUX-LCDs Typical organisation of triplex driving

9. CONNECTING LCDs

- Fixed pins have a typical pitch of 2,54mm. (Pls refer to mechanical specification).
- LCD for elastomeric connectors (zebras) may have thighter pitches. Please regard tolerances and pitch of elastomer connector.

10. SOLDER CONDITIONS FOR LCD WITH FIXED PINS

	min.	typ.	max.
Solder temperature	t.b.d.	~ 235°C	260°C
Solder duration	t.b.d.	2 seconds	5 seconds
Distance to glass substrate	4mm	6mm	t.b.d.

t.b.d. – to be discussed!

11. CLEANING OF LCDs

- LCDs have a protective foil on top of the front glass. This foil should be removed at the latest possible stage.
- If there is a need of cleaning, you may use freon or alcohol with a soft fabric, as front polarizers are sensitive to physical damage.
- Pls also note this protective foil on the rear side, in case you use transflective model-types.
- Do not use ultrasonic for cleaning of PCB once LCD is soldered.

12. HANDLING PRECAUTIONS

- As polarizers of LCD (front and rear-side) are sensitive, they must be handled with care.
- DC Voltage or drive voltage higher than specified voltage will decrease the lifetime of the liquid crystal display panel.
- If any fluid leaks out of a damaged glass cell, wash off any human part that comes into contact with soap and water. Never swallow the fluid. The toxicity is low, but caution should exercised at all times.
- LCD is made up of glass, organic sealant, organic fluid and polymer based polarizers. The following precautions should be taken when handling:
 - Keep the temperature within range for use and storage. Excessive temperature and humidity could cause polarization degredation, polarizer peel-off or bubble generation. When storage for a long period over 40°C is required, the relative humidity should be kept below 60%.
