## **MiniBox** gel insulated box

## IPX8 gel insulated protection device

**Minibox** is the new IPX8 device tested in accordance with CEI EN 60529. Thanks to the polypropylene shell with snap closure and the pre-filled silicone gel, it **insulates and protects electrical connections even in the presence of water.**

### Versatility

Its compact dimensions and suitability with multiple types of electrical connectors (Spring Box<sup>®</sup>, TBOX<sup>®</sup>, mammoths, ledstrip connectors), audio / video (BNC, type F, CCTV camera connectors, balun, balanced audio cables) make **Minibox** ideal for audio / video telecommunications and home automation connections.

### Reaccessible

**Minibox** is easily reaccessible thanks to the final soft state of the prefilled gel.

### Safe

The gel contained in **Minibox** is non-toxic, without expiration and maintains its protection and insulation features over time. It is classified as a non-hazardous product in accordance with European Regulation No. 1272/2008 (CLP).

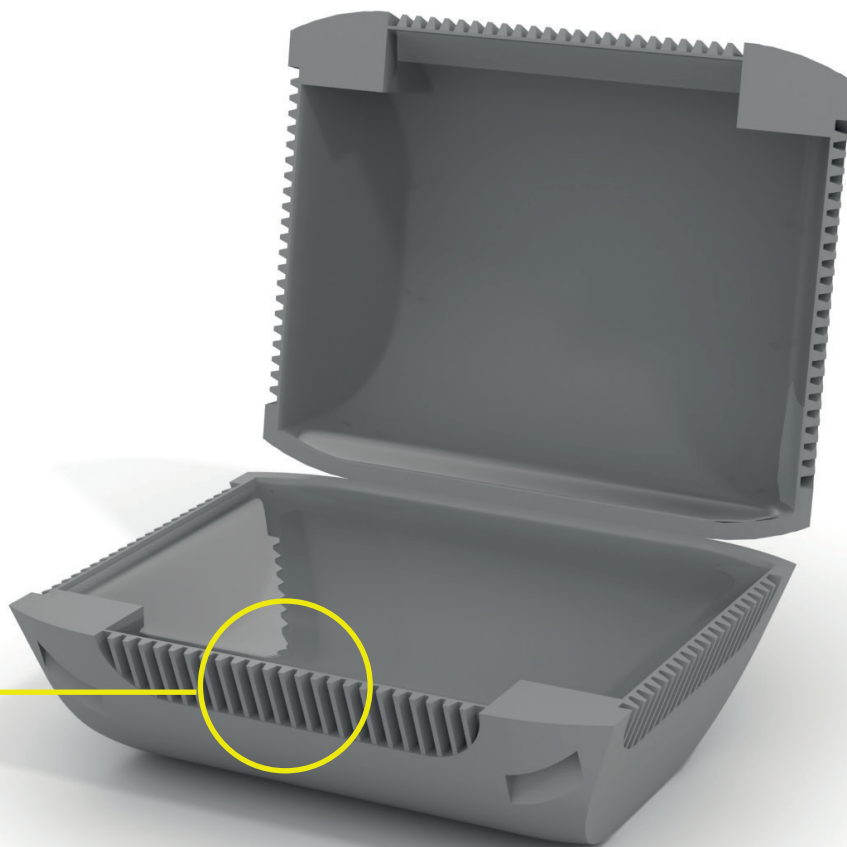

## Cable entry on 3 sides

Maximum flexibility of use.

## Breakeable walls

Thanks to its design, the walls easily adapt to the cables and ensure the exit of the gel only where it is necessary to seal the connection.

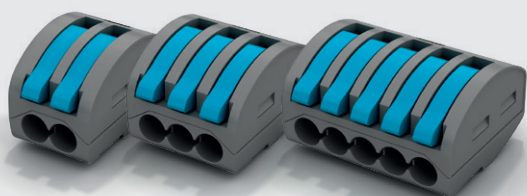

## 3 sizes available

For using with a wide range of connectors

## Suitable connectors
